

TheiCare

where Kids love to be!

It has been so lovely getting to meet the new faces coming to OSTC (outside school hours care) lately. This past couple of weeks the children have been using their hands to manipulate air-drying foam, there has been much enjoyment as their creations come to life. Leading off the sensory side of the foam we have started to incorporate sensory items such as, kinetic sand, Oobleck and plasticine into our program. Alongside some cool science experiments. Following the child's lead is so important to us here at TheiCare Colac and giving the children a choice in what activities they would like to participate in has allowed the children to branch out and find enjoyment in things they usually wouldn't. We hope to see many more new faces as families become familiar and take advantage of the fun, engaging program here at OSCH Colac Primary TheiCare.
